AS - 40D

ULTRA - COMPACT DMX-512 DIMMER

4 CHANNELS

600 WATTS PER CHANNEL

DMX-512 CONTROL

STAND ALONE CHASER MODE

RELAY MODE SWITCHABLE

The DMX-512 standard combined with the proven quality and reliability of the AS-40 design makes for an impressive product. It is addressable up to 512 channels and has a built-in stand alone chaser mode which provides 8 chase patterns. The AS-40D may also be switched to a relay (non dim) mode in groups of 2 channels for ON/OFF control. High capacity 15 Amp triacs and externally accessible fuses for each channel ensure the dependability of this tough compact dimmer. Heavy duty filtering eliminates EMI/RFI interference with other equipment.

The AS-40D is the perfect choice for inexpensive, high quality DMX dimming needs in a compact design. Choose quality and reliability, choose Lightronics.

SPECIFICATIONS

Channels:	4	Preheat:	8.5VAC
Load Capacity:	600 Watts per Channel 2400 Watts Total	Curve:	Modified Square Law
Control Protocol:	DMX-512	Filter Rise Time:	350 Microseconds
Control Connections:	Dual 5 pin XLR Connectors	Response Time:	8.3 Milliseconds
Addressing:	512 Channels	Full Load Voltage Drop:	3VAC
Power Requirements:	120VAC, 50/60 Hz, 20 Amps	Conduction Angle:	0 - 180 Degrees
External Fuses:	5 A, 250V each channel	Efficiency:	97%
		Dimensions:	9"H X 8"W X 2.25"D
		Weight:	3.6 Pounds
